

How to make ant ANTENNAE

....for wearing wherever you want!

1. Grab a headband
2. Find TWO pipecleaners in a colour you'd like your antennae
3. Get TWO pieces of wire (if you're pipe cleaners aren't stiff enough)
4. Wind the wire and pipe cleaners together so that the wire helps you shape the pipecleaner
5. Attach the wire and pipecleaner to the headband by winding them around it.
6. Bend your antennae so that you've got an 'elbow' in the middle somewhere.

TA-DAAH!

Put your antennae on & be an ant for the day!
